# Innovative Solutions for Dealership Parts Departments

When you have customers waiting at your counter or on the phone, you have to find parts fast. That's why our custom-designed parts storage systems continue to be the most efficient and effective options on the market today. We put more parts closer to where you need them, reducing retrieval time, technician downtime and customer waiting.

## You'll receive these benefits:

- Faster and more accurate parts picking
- Increased productivity and efficiency
- Lower overall dealership costs
- Optimized floor space
- Tough and long lasting products

Deluxe Systems can assist in every phase of the project, from initial planning and layout through installation and start-up. Deluxe Systems can bring together the right combination of bins, racks, counter units, accessories and multi-level systems to organize your parts and make smart use of your dealership's floor space. We can draw upon additional resources, provide technical assistance and employ the latest in computer design software.

## Configura® Complements Our Expertise

We now have Configura, a powerful computer aided design tool, which, when combined with our decades of experience, allows us to offer a service unmatched in

the industry. When a drawing is created in Configura, everything else is automatically generated. The 3-D visualization output in Configura gives you confidence that the layout of your parts department will meet your desired goals for storage density and product flow. Configura links all

of the steps in the process and offers these advantages:

- Parts list generated from drawing
- Modifications can be made easily
- High resolution 3-D visualization
- Faster quotation lead times

## Pro Series Workbench Systems For Service Departments

Service Departments have always been integral to a dealership's profitability. Now, they are becoming more visible to customers. A state-of-the-art service department with well trained and well equipped technicians is a key component in developing long term repeat customers. To help you achieve your service department goals, Deluxe Systems introduces the Borroughs Pro Series workbench system.

Borroughs Pro Series will accommodate virtually everything your techs need. Overhead cabinets have locking doors for a neat appearance and are designed to hold lift controls, computers, keyboards, telephones, binders and other shop supplies. The workbench has a 12 gauge steel work surface, accommodates a number of fluid and utility reels and will provide a concealed compartment for lift control power units.
